COMPONENT SPECIFICATION

- Mechanical Chassis and Drive System:

Body made of 2 plates of 75 mm radius, 5 mm thickness vertically separated by 50mm. Wheels of radius 30mm and thickness 21 mm.

2 battery operated DC Gear motors (6V)

- Control Electronics and Actuation:

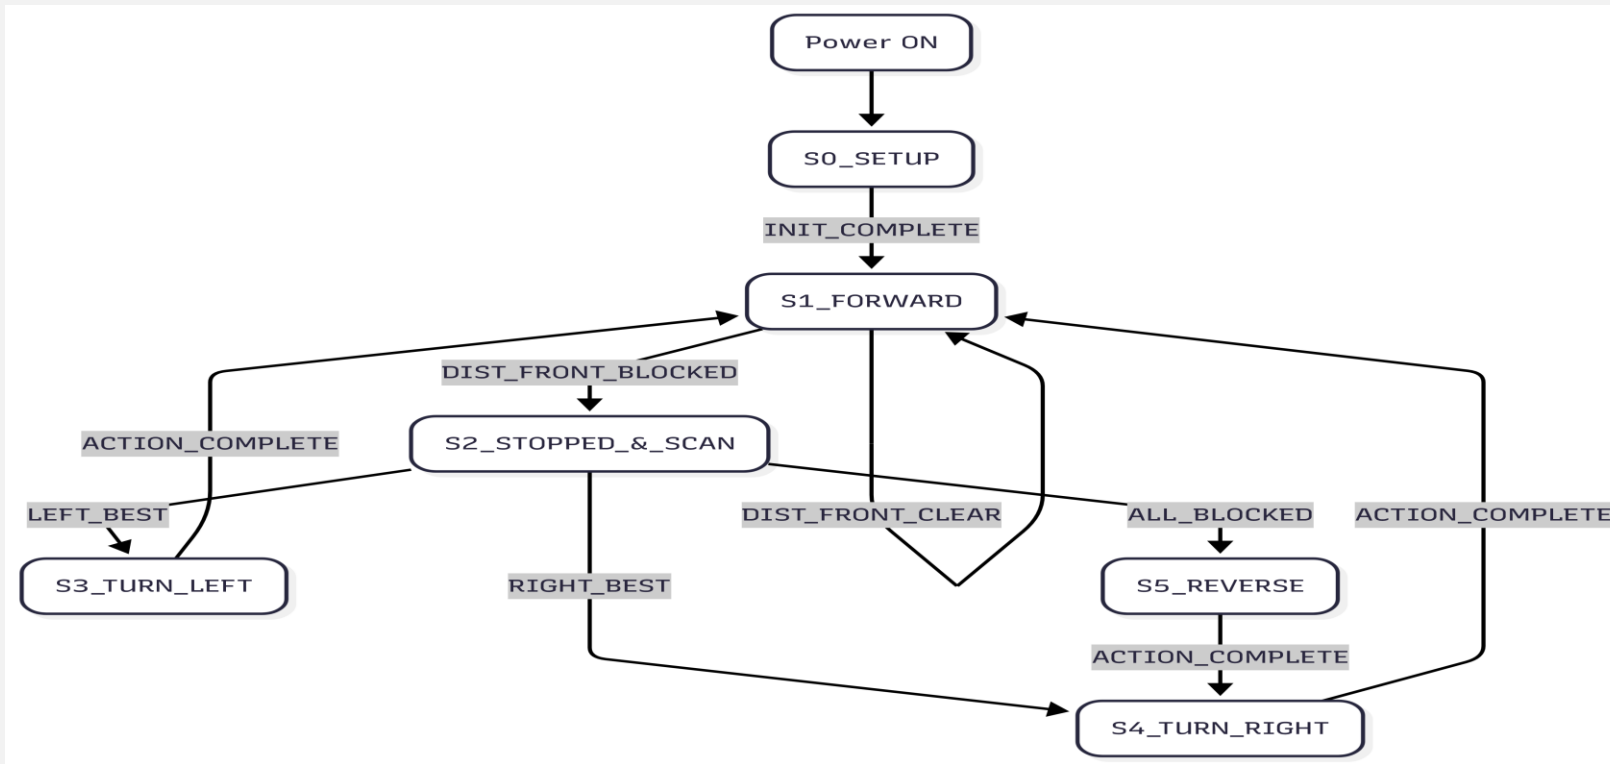

Microcontroller Arduino Uno R3

Motor Driver L293D

HC-SR04 Ultrasonic Ranging Module mounted on SG90 Micro Servo (For sweeping front field view)

Power Supply: 4x AA Battery Pack.
